

Potential Stratified Drift Aquifer Areas Map Legend

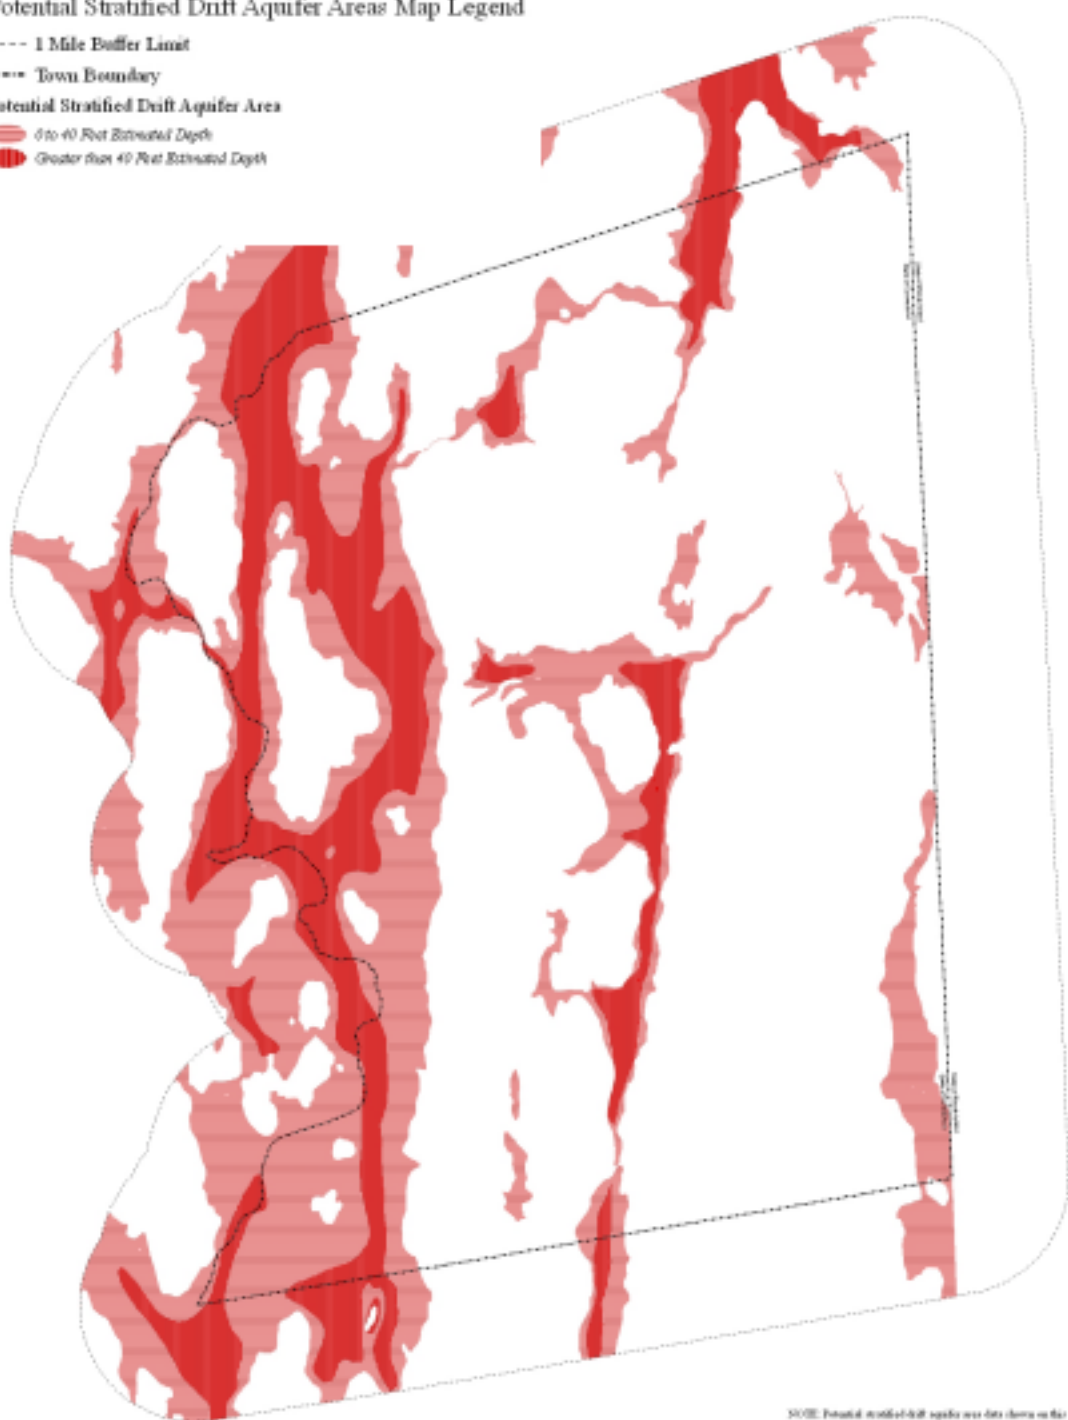

----- 1 Mile Buffer Limit

----- Town Boundary

Potential Stratified Drift Aquifer Area

 0 to 40 Feet Estimated Depth

 Greater than 40 Feet Estimated Depth

NOTE: Potential stratified drift aquifer area data shown on this map do not extend into the geographic area covered by the State of Rhode Island.

0 0.5 1 2 Miles

0 2,500 5,000 10,000 Feet

Scale 1:24,000 1 inch = 2000 feet

Red numbers on scale bars that do not align with the grid are rounded to the nearest value of the fractional distance. All distances shown are approximate and should not be used for navigation purposes.

Features shown on this map may extend up to one scale unit outside of the town boundary shown on this map. Some features shown on this map may be clipped and not fully represented.

This map is intended for planning purposes only. It is neither an authoritative geospatial information system, nor does it constitute an authoritative geospatial information system.
